Methylation-induced downregulation and tumor-suppressive role of microRNA-98 in glioma through targeting Sal-like protein 4ZHIWEI XIA, DONGXU QIU, JUN DENG, XIAO JIAO,
RONGHE YANG, ZHONGYI SUN, XIN WAN and JING LI

Int J Mol Med 41: 2651-2659, 2018; DOI: 10.3892/ijmm.2018.3464

Following the publication of this paper, it was drawn to the Editors' attention by a concerned reader that certain of the cell Transwell assay data in the article (featured in Figs. 4D and 6D) were strikingly similar to data appearing in different form in other articles by different authors at different research institutions, which were already under consideration for publication or had already been published elsewhere at the time of the present article's submission.

Owing to the fact that the contentious data in the above article had already appeared in different form in other articles prior to its submission to *International Journal of Molecular Medicine*, the Editor has decided that this paper should be retracted from the Journal. After having been in contact with the authors, they agreed with the decision to retract the paper. The Editor apologizes to the readership for any inconvenience caused.
