Following the publication of this paper, it was drawn to the Editor's attention by a concerned reader that certain of the Transwell invasion assay data shown in Fig. 3A and B on p. 1306 were strikingly similar to data appearing in different form in a paper by different authors at a different research institute that had already been submitted for publication.

Owing to the fact that the contentious data in the above article had already been submitted for publication prior to its submission to *International Journal of Molecular Medicine*, the Editor has decided that this paper should be retracted from the Journal. After having been in contact with the authors, they accepted the decision to retract the paper. The Editor apologizes to the readership for any inconvenience caused.
