In this article, Fig. 2 is incorrect. The corrected Fig. 2 is shown using data from the tissue array samples. The new figure demonstrates the same findings as the original figure. Accordingly, in the paragraph of Materials and methods, the sentence ‘...surgically resected colon cancer tissues’ and ‘This study was...research committee’ and in the paragraph of Results, the sentence ‘Similar results were...tissue array samples’ should be deleted. The above changes do not alter the original conclusions of this study.
