MicroRNA-873 targets HOXA9 to inhibit the aggressive phenotype of osteosarcoma by deactivating the Wnt/ β -catenin pathway

YILIN LIU, YUQIANG WANG, HAO YANG, LIANG ZHAO, RUIPENG SONG, HONGYU TAN and LIMIN WANG

Int J Oncol 54: 1809-1820, 2019; DOI: 10.3892/ijo.2019.4735

Following the publication of this paper, it was drawn to the Editors' attention by a concerned reader that various panels showing the data from flow cytometry experiments in Figs. 2D, 5D and 6D, and certain of the migration assay data shown in Fig. 7A, were strikingly similar to data appearing in different form in other articles by different authors. Owing to the fact that the contentious data in the above article were already under consideration for publication prior to its submission to *International Journal of Oncology*, the Editor has decided that this paper should be retracted from the Journal. The authors were asked for an explanation to account for these concerns, but the Editorial Office did not receive a reply. The Editor apologizes to the readership for any inconvenience caused.
