Overexpression of the chimeric plasmin-resistant VEGF165/VEGF183 (132-158) protein in murine breast cancer induces distinct vascular patterning adjacent to tumors and retarded tumor growth

HUI-YONG ZHANG, BING-LIN FAN, XIN-SHENG WU,
LING-MIN MU, WEN-FENG WANG and WU-LING ZHU

After the publication of the article, the authors noted that they had made an error regarding certain facts in their manuscript: In the abstract VEGF192 (132-158) should be changed to VEGF183 (132-158) (Page 1, Line 2). In addition, width should be changed to width² (Page 3, Line 50). The authors regret these errors. [the original article was published in the Molecular Medicine Reports 11: 1483-1489, 2015 DOI: 10.3892/mmr.2014.2866]
