microRNA-574 inhibits cell proliferation and invasion in glioblastoma multiforme by directly targeting zinc finger E-box-binding homeobox 1

YOUYAN MAO, FANGMENG WEI, CHENGHONG WEI and CHENGJUN WEI

MolMedRep 18: 1826-1834, 2018; DOI: 10.3892/mmr.2018.9106

Following the publication of this paper, it was drawn to the Editors' attention by a concerned reader that certain of the data shown in the cell invasion assays in Figs. 2C and 5C were strikingly similar to data appearing in different form in other articles by different authors. Owing to the fact that the contentious data in the above article had already been published elsewhere, or were already under consideration for publication, prior to its submission to *Molecular Medicine Reports*, the Editor has decided that this paper should be retracted from the Journal. The authors were asked for an explanation to account for these concerns, but the Editorial Office did not receive a reply. The Editor apologizes to the readership for any inconvenience caused.
