Salidroside protects SH-SY5Y from pathogenic α-synuclein by promoting cell autophagy via mediation of mTOR/p70S6K signaling

SHASHA CHEN, FENG CAI, JIRONG WANG, ZHOUXIN YANG, CHI GU, GUOFU WANG, GENXIANG MAO and JING YAN

Mol Med Rep 20: 529-538, 2019; DOI: 10.3892/mmr.2019.10285

Following the publication of the above paper, it was drawn to the Editor's attention by a concerned reader that certain of the western blot data featured in Fig. 2A on p. 533 were strikingly similar to data that had already been submitted for publication to the journal *OncoTargets and Therapy* in a paper that was written by different authors at different research insititutes. Additionally, data from the same figure were found to be remarkably similar to western blot data that were submitted to other journals in papers written by different authors either at around the same time, or up to a couple of years afterwards.

Owing to the fact that the contentious data in the above article had already been submitted for publication prior to its submission to *Molecular Medicine Reports,* the Editor has decided that this paper should be retracted from the Journal. The authors were asked for an explanation to account for these concerns, but the Editorial Office did not receive a reply. The Editor apologizes to the readership for any inconvenience caused.
