Oncol Lett 14: 3580-3586, 2017; DOI: 10.3892/ol.2017.6584

Following the publication of this article, an interested reader drew to our attention an error in the published text: On p. 3580, the first sentence of the Abstract should have read as "Wee1-like protein kinase (WEE1) physiologically serves a key function in maintaining the integrity of the cell genome through mediating the **in**activation of cyclin-dependent kinase (CDK)1 and CDK2." (i.e., "activation" was featured incorrectly). Likewise, the first sentence in the Introduction should have read as "Wee1-like protein kinase (WEE1) ... contributes to the upstream regulation of the cyclin-dependent kinase (CDK) complexes by mediating the **in**activation of CDK1."

We apologize that these errors were allowed to remain in the paper, and regret the inconvenience that this has caused.
