The association between inflammation, the microbiome and urethane-induced pulmonary adenocarcinoma

ZENGHUA DENG, ZHIHUI LI, CHANGQING SUN, HUI XIE, ZHENGANG CHEN, JINBO LIU, HUI WANG, CHENGGANG ZHANG and GUANGSHUN WANG

Oncol Lett 15: 6352-6360, 2018; DOI: 10.3892/ol.2018.8167

Subsequent to the publication of this article, the authors have realized that a sentence was written incorrectly in the concluding paragraph. On p. 6358, right-hand column, line 26, the sentence commencing 'In the present study, it was demonstrated that prebiotics.' should have read as follows (changes highlighted in bold): 'In the present study, it was demonstrated that prebiotics may **decrease** levels of inflammation and **change** the composition of the microbiome in the intestinal and respiratory tracts, and improve the treatment of lung cancer.'

The authors apologize for this oversight on their part, and for any inconvenience caused.
