Following the publication of this paper, it was drawn to the Editor's attention by a concerned reader that the scratch-wound assay data shown in Fig. 2 on p. 2418 in this paper contained a number of anomalous features that could not readily be explained by chance alone, or through the coincidental placement of similar-looking data. Consequently, the Editor of *Oncology Letters* has determined that this paper should be retracted from the Journal. The authors were asked for an explanation to account for these concerns, but the Editorial Office did not receive a reply. The Editor apologizes to the readership for any inconvenience caused.
