

Figure S1. (A) miR-25-3p was validated as a direct target of LINC00858 using RIP assay. (B) The expression level of miR-25-3p was assessed after transfection with miR-NC or miR-25-3p mimics using reverse transcription-quantitative PCR. (C) The expression level of miR-25-3p was measured after transfection with NC or miR-25-3p inhibitor using reverse transcription-quantitative PCR. Data are presented as the mean \pm SEM; $n \geq 3$. ** $P < 0.01$. miR, microRNA; RIP, RNA-binding protein immunoprecipitation.
