

Figure S1. (A) Blood levels of MDA in the Sham, TV/PP, Post-5 and Post-2.5 groups after 30 min of pneumoperitoneum. (B and C) Blood levels of GSH in the Sham, TV/PP, Post-5 and Post-2.5 groups after (B) 2 h and (C) 6 h of pneumoperitoneum. * $P < 0.05$ and ** $P < 0.01$. MDA, malondialdehyde; GSH, reduced glutathione; TV/PP, transvaginal pneumoperitoneum.

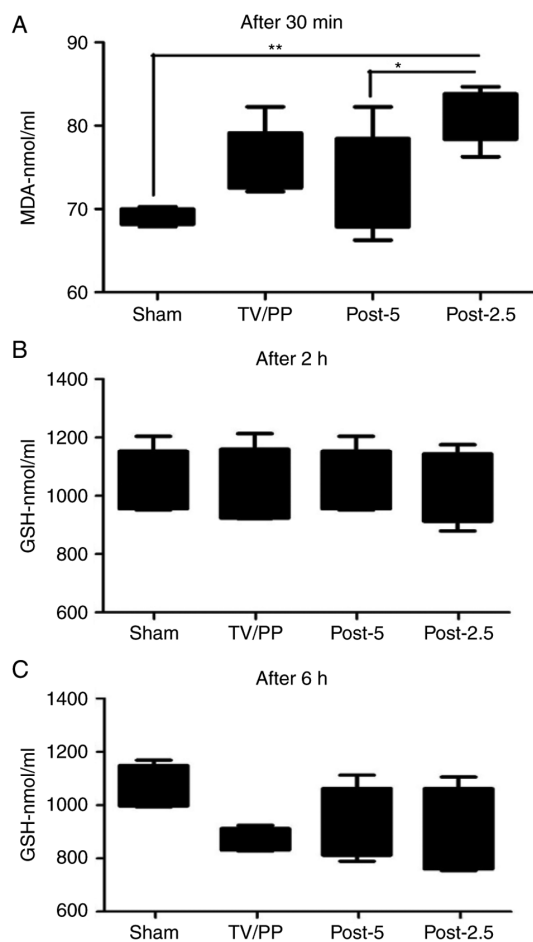

Figure S2. (A and B) Activity of SOD after (A) 30 min and (B) 6 h of pneumoperitoneum. SOD, superoxide dismutase; TV/PP, transvaginal pneumoperitoneum.
