

Figure S1. Confirmation of gene overexpression or silencing in H9c2 (2-1) cells. (A) mRNA expression of ETS2 after overexpression of ETS2. (B) Protein expression of ETS2 after overexpression of ETS2. (C) mRNA expression of ETS2 after ETS2 knockdown. (D) Protein expression of ETS2 after ETS2 knockdown. (E) Expression of miR-155 after miR-155 mimic or inhibitor transfection. *** $P < 0.001$. si, small interfering RNA; ETS2, E26 transformation-specific transcription factor 2; NC, negative control; miR-155, microRNA-155.
