Figure S1. Expression levels of NPBWR1-2 in four ovarian cancer cell lines following NPBWR1-2 overexpression. Cells were transfected with an NPBWR1-2 overexpression vector or a nonsense pcDNA3.1 control vector. \*P<0.05, \*\*\*P<0.001 and \*\*\*\*P<0.0001. NPBWR1-2, neuropeptides B and W receptor 1-2; NC, negative control.

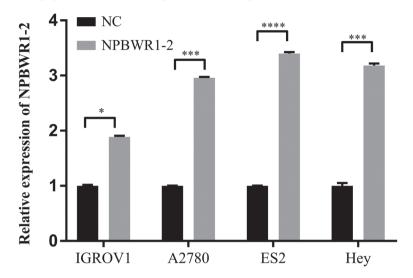

Figure S2. NPBWR1-2 overexpression decreases cell viability in five ovarian cancer cell lines. \*\*\*P<0.001 and \*\*\*\*P<0.0001. NPBWR1-2, neuropeptides B and W receptor 1-2; lncRNA, long non-coding RNA; NC, negative control.
