

Figure S1. Knockdown of miR-1307-3p inhibits cell proliferation. (A) miR-1307-3p expression levels and (B) cell proliferation in NCM460 cells transfected with miR-1307-3p inhibitor or miR-con. *** $P < 0.01$ vs. miR-con. miR-1307-3p: microRNA-1307-3p; miR-con: Negative control miRNA; OD, optical density.
