

Figure S1. Transfection efficiency of miR-187-3p mimic and inhibitor. (A) miR-187-3p mimic increased the expression of miR-187-3p compared with mimic NC group in the absence of any other treatment. (B) miR-187-3p inhibitor decreased the expression of miR-187-3p compared with inhibitor NC group in the absence of any other treatment. Data are presented as the mean \pm SD; n=3/group. **P<0.01. miR-187-3p, microRNA-187-3p; NC, negative control; rno, *Rattus norvegicus*.
