

Figure S1. Fluorescence of cells transfected with the control plasmid pLVX-shRNA2-EGFP-Puro, pLVX-miR-576-3p, pLVX-miR-576-3p-antisense, pLVX-miR-135a-5p or pLVX-miR-135a-5p-antisense (x100). GFP fluorescence represent plasmid transfection efficiency. miR, microRNA; sh, short hairpin; GFP, green fluorescent protein.
