

Figure S1. Detection of the cell migration and invasion abilities of cisplatin- and carboplatin-resistant cells and sensitive ovarian cancer cells as detected by the Transwell migration and invasion methods. (A) Migration and invasion results between sensitive ovarian cancer cells SKOV3, HeyA8, A2780 and resistant SKOV3-CDDP, HeyA8-CDDP, A2780-CBP cell lines. (B) Quantification of the percentage of migration is shown between the parental sensitive/resistant: (a) SKOV3/SKOV3-CDDP, (b) HeyA8/HeyA8-CDDP and (c) A2780/A2780-CBP cell lines. (C) Quantification of the percentage of invasion is shown between the parental sensitive/resistant: (a) SKOV3/SKOV3-CDDP, (b) HeyA8/HeyA8-CDDP and (c) A2780/A2780-CBP cell lines. ** $P<0.01$, compared with the sensitive parental cell line. CDDP, cisplatin; CBP, carboplatin.
