Figure S1. Analysis of RPN2 expression and clinical parameters from the Chinese Glioma Genome Atlas dataset (Mseq-325). Specified parameters were analyzed based on (A) IDH gene mutation status, (B) 1p/19q codeletion status and (C) age. **P<0.01, ****P<0.0001. RPN2, ribophorin II; IDH, isocitrate dehydrogenase.
