

Figure S1. Transfection efficiency of miR-1236-3p mimic and inhibitor. Expression levels of miR-1236-3p following the transfection of Y79 cells with (A) miR-1236-3p mimic or miR-NC mimic and (B) miR-1236-3p inhibitor or miR-NC inhibitor were determined using reverse transcription-quantitative PCR. *P<0.05, **P<0.01 vs. miR-NC mimic/inhibitor group. miR, microRNA; NC, negative control.
