

Figure S1. CTSB expression levels following transfection with siCTSB or Ad-CTSB. The protein expression of CTSB in H9C2 transfected with siCTSB. (A) Western blotting images and (B) quantitative results. * $P < 0.05$ vs. siNC. Protein expression levels of CTSB in H9C2 transfected with Ad-CTSB. (C) Western blotting images and (D) quantitative results. $n = 6$. * $P < 0.05$ vs. Ad-NC. CTSB, cathepsin B; si, small interfering; Ad, adenovirus; NC, negative control.
