

Figure S1. Expression levels of 12 related genes of non-eosinophil polyps, eosinophil polyps and nasal mucosa tissues. Blue represents non-ECRSwNP, red represents non-nasal mucosa tissues (CTRL) and green represents ECRSwNP. ECRSwNP, eosinophilic chronic rhinosinusitis with nasal polyps; non-ECRSwNP, non-eosinophilic chronic rhinosinusitis with nasal polyps; CTRL, control; OR10A3, olfactory receptor 10A3; OR1A1, olfactory receptor 1A1; PPARD, peroxisome proliferator-activated receptor δ ; ABCC8, ATP-binding cassette sub-family C member 8; PPARG, peroxisome proliferator-activated receptor γ ; CCL-26, C-C motif chemokine 26; AQP10, aquaporin-10.
