

Figure S1. Effect of TIPE1 on the cell cycle distribution in ovarian cancer cells. (A) Cell cycle distribution of A2780-Ctrl and A2780-TIPE1 cells. (B) BrdU analysis of A2780-Ctrl and A2780-TIPE1 cells. Scale bar, 100 μ m. The percentage of BrdU positive cells in each frame were counted and analyzed. TIPE1, tumor necrosis factor- α -induced protein 8-like 1; Ctrl, control; BrdU, 5-bromo-2-deoxyuridine.
