

Figure S1. Successful overexpression of miR-423-5p and downregulation of NACC1 in MCL cells. (A) Relative expression of miR-43-5p in JVM-2 cells after transfection with miR-423-5p mimics and miR-NC plasmid evaluated by quantitative real-time PCR. (B) NACC1 at the protein level in JVM-2 cells transfected with siNACC1 plasmid as assessed by western blotting. Data are presented as mean  $\pm$  SD of three independent experiments. \*\*\* $P$ <0.001. MCL, mantle cell lymphoma; NACC1, nucleus accumbens-associated 1.

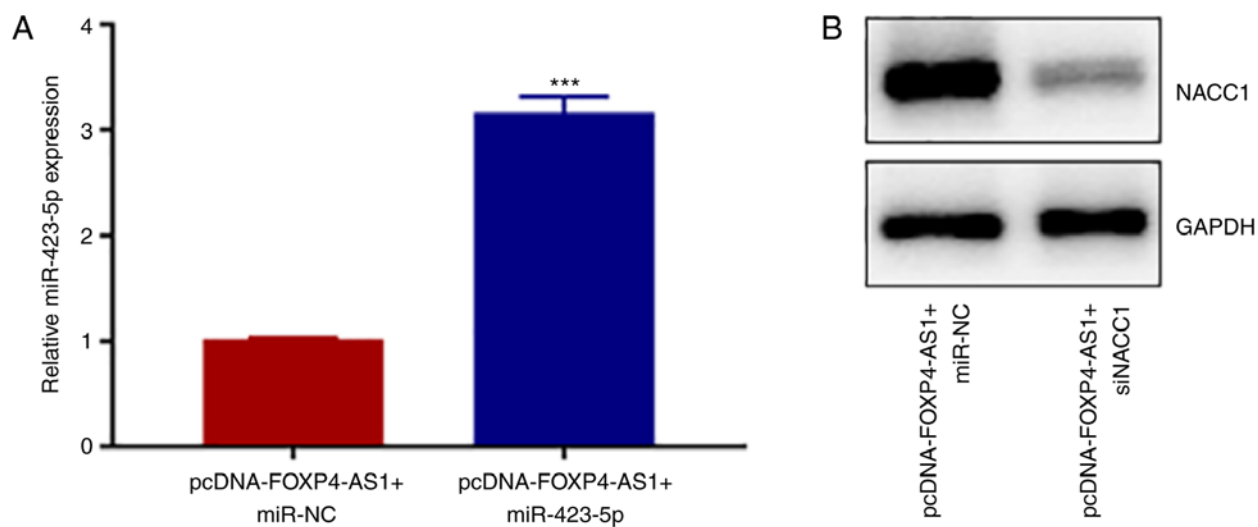

Table SI. The sequences of PCR primers.

Name		Sequence (5'-3')
FOXP4-AS1	Forward	GTGAGCTTCTGGGTTCGACA
	Reverse	ATTGAGGGTTAGGGCAGCAC
miR-423-5p	Forward	TCCGTGCAAAGTGGTATCCT
	Reverse	TCGCTTCGTCAAACACTGTC
NACC1	Forward	CTCTCCCGGCTGAACTTATCAAC
	Reverse	GTACACGTTGGTGCCTGTCAC
GAPDH	Forward	CCTTCATTGACCTCAACTACA
	Reverse	GCTCCTGGAAGATGGTGAT
U6	Forward	CTCGCTTCGGCAGCACATATACT
	Reverse	ACGCTTCACGAATTTGCGTGTC
