

Figure S1. ROC analysis for comparison of the three lncRNA predictive models was performed. The AUC of ROCs indicated the 4-lncRNA model (0.718) from the present study was better than those in the other studies (3-lncRNA signature: 0.664; 5-lncRNA signature: 0.603). ROC, receiver operating curve; lncRNA, long non-coding RNA; AUC, area under the curve.
