

Figure S1. Overexpression of NOVA1 in Y79 and WERI-Rb-1 cell lines. The efficiency of overexpression of NOVA1 was verified via (A) reverse transcription-quantitative PCR and (B) western blotting. The data are presented as the mean \pm SEM from ≥ 3 independent experiments. *** $P < 0.0001$ vs. NC. NC, negative control; NOVA1, neuro-oncological ventral antigen 1.
