

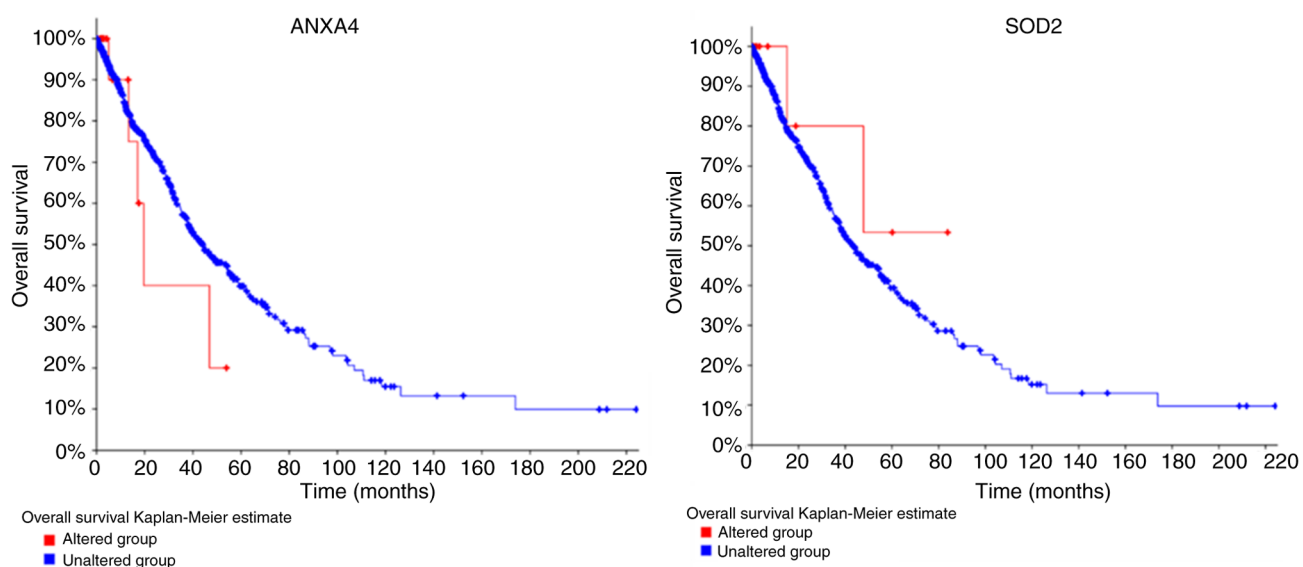

Figure S1. Survival rates of patients with lung cancer using The Cancer Genome Atlas Pan-Lung Cancer database (1,144 samples) were analyzed on the cBioPortal website. ANXA4, annexin 4; SOD2, superoxide dismutase 2.

		Number of cases total	Number of cases deceased	Median months survival	Logrank test p-value
ANXA4	Altered group	17	5	19.50	0.326
	Unaltered group	937	267	43.91	
SOD2	Altered group	12	2	NA	0.388
	Unaltered group	942	270	43.26
