

Figure S1. Analysis of the expression of XLOC_083369, XLOC_053870, XLOC_174539, XLOC_097278 and XLOC_138151 in sciatic nerve segments at 0, 1, 4, 7 and 14 days after nerve crush. Gene expression patterns of (A) XLOC_083369, (B) XLOC_053870, (C) XLOC_174539, (D) XLOC_097278 and (E) XLOC_138151 were determined by reverse transcription-quantitative PCR with normalization to GAPDH. Values are expressed as the mean with standard error of the mean (n=3). *P<0.05 vs. day 0. d, days.
