

Figure S1. miR-486-5p expression was determined in AGS and HGC27 cells transfected with Ctrl inhibitor and miR-486-5p inhibitor using reverse transcription-quantitative PCR. miR, microRNA; Ctrl, control.

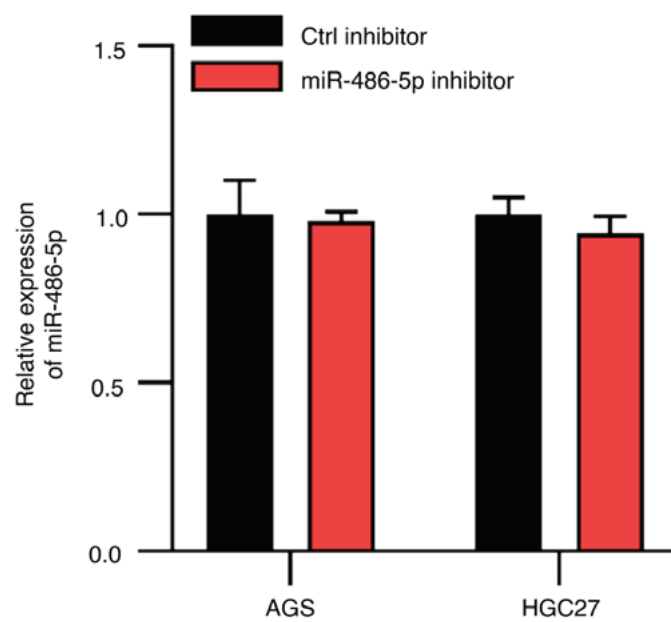

Figure S2. The FGF9 protein level was determined in AGS and HGC27 cells with Ctrl and FGF9 overexpression using Western blot assay. FGF9, fibroblast growth factor 9; Ctrl, control.
