

Figure S1. (A) The transfection efficiency of pre-miRNA-335. (B) The transfection efficiency of anti-miRNA-335. * $P < 0.05$ vs. the Sham group; $n = 5$. miRNA/miR, micro RNA; NC, negative control.

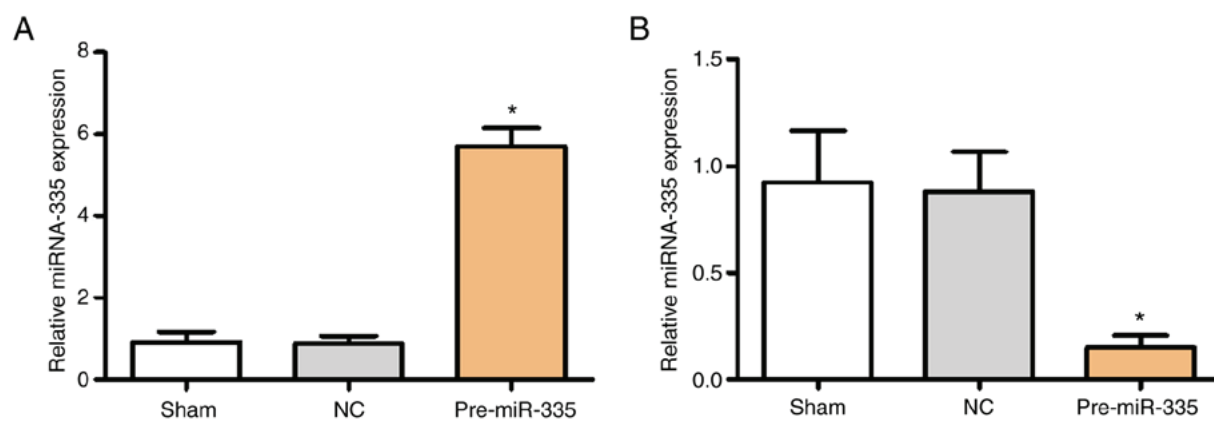

Figure S2. The expressions of miR-335 at 12, 24, 48, 72 h. *P<0.05 vs. CLP. n=5. miRNA/miR, micro RNA; CLP, cecal ligation and puncture.
