

Table SI. Diagnostic parameters to evaluate the diagnostic potential of miR-31 and miR-145 on an independent set of samples at the polyp stage.

miR	PPV	NPV	DA (%)
miR-31	89.5	58.3	77.4
miR-145	77.8	75	76.7

PPV, positive predicted value, NPV, negative predicted value; DA, diagnostic accuracy; miR, microRNA.
