

Figure S1. Preliminary tests of inhibitors on the regulation of hypoxia-induced ANP secretion in isolated beating rat atria (n=3). GLX1, IC₅₀ dose of GLX351322 (5 μ M); GLX2, effective dose of GLX351322 (35 μ M); EX1, IC₅₀ dose of EX3527 (123 nM); EX2, effective dose of EX527 (0.25 μ M); ML1, IC₅₀ dose of ML385 (1.9 μ M); ML2, effective dose of ML385 (10 μ M). ***P<0.001 vs. control; #P<0.05, ###P<0.001 vs. Hy. Hy, hypoxia.
