Figure S1. ROC curve for angiopoietin-like 4 level to discriminate patients with lung metastasis from patients with no metastasis. The area under the ROC curve was 0.9450. ROC, receiver operating characteristic.

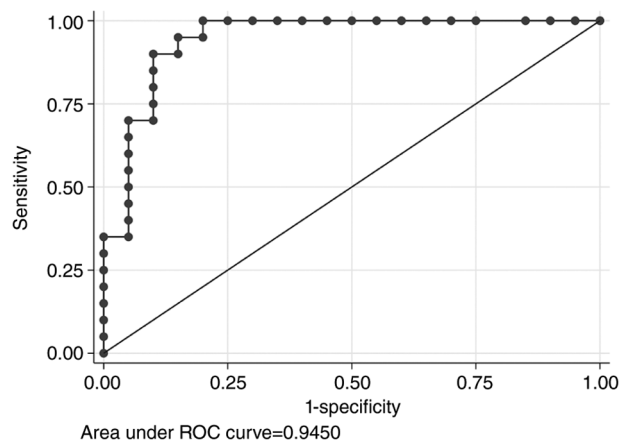

Area under ROC curve=0.9450

Figure S2. ROC curve for angiopoietin-like 4. The optimal cut-point was indicated by a single mark on the ROC curve. ROC, receiver operating characteristic.

Area under ROC curve=0.9450
