Figure S1. Expression levels of C-X-C motif chemokine ligand 3 in different types of normal human tissue. (A) HPA RNA-seq dataset, (B) GTEx project and (C) FANTOM5 project. HPA, Human Protein Atlas; GTEx, Genotype-Tissue Expression; FANTOM5, the Functional Annotation of Mammalian Genomes 5.
Figure S2. mRNA expression levels of C-X-C motif chemokine ligand 3 in normal colon tissue and primary colon tumors. *P<0.05 as indicated.
