

Figure S1. TUNEL staining in FLNA-C and FLNA-CKO mice. (A) TUNEL staining was used to detect pulmonary arteriole apoptosis in FLNA-C and FLNA-CKO mice. The arrows indicate TUNEL-positive cells; (B) Number of TUNEL-positive cells in pulmonary arterioles. ** $P < 0.01$ vs. FLNA-C. FLNA-C, FLNA^{flox/Y} Tagln-Cre^{ERT2-} mice; FLNA-CKO, FLNA^{flox/Y} Tagln-Cre^{ERT2+} mice; FLNA, filamin A.
