

Supplementary tables

Table SI. Analysis of platelet-related parameters between survivors and non-survivors.

Parameter	Admission vs. treatment endpoint				Survivors vs. non-survivors			
	Survivors		Non-survivors		Admission		Treatment endpoint	
	t-value ^a	P-value	t-value ^a	P-value	t-value ^b	P-value	t-value ^b	P-value
Platelet activation (CD62P-PE)	2.281	0.039	- 3.564	0.003	1.571	0.127	-2.311	0.028
$\Delta\Psi_m$ (Mmp-Index)	-2.294	0.038	4.813	0.000	0.715	0.480	4.406	0.000
Apoptosis (Annexin V-APC)	3.254	0.006	- 2.630	0.019	-1.790	0.084	-3.632	0.001
TWEAK, pg/ml	-0.613	0.550	- 1.568	0.138	-0.321	0.750	-1.057	0.299
Ang-2, ng/ml	3.165	0.007	- 3.342	0.004	-2.464	0.020	-4.509	0.000

^aPaired samples t test; ^bindependent samples t test. Mmp, mitochondrial membrane potential;

TWEAK, tumor necrosis factor-like weak inducer of apoptosis; Ang-2, angiopoietin-2; APC, allophycocyanin; PE, phycoerythrin.

Table SII. Repeated measures of platelet-related parameters between groups (non-survivors vs. survivors).

Source	Clinical outcome					Sample extraction time					Interaction between clinical outcome and sample extraction time				
	Type III sum of squares	df	MS	F-val	P-value	Type III sum of squares	df	MS	F-val	P-value	Type III sum of squares	df	MS	F-val	P-value
