

Figure S1. Relative expression of BLACAT2, miR-378a-3p, and YY1 in tumors according to reverse transcription-quantitative PCR. $P < 0.05$ and $**P < 0.01$ vs. Lv-NC or Lv-shNC. BLACAT2, bladder cancer-associated transcript 2; YY1, Yin Yang 1; miR, microRNA.

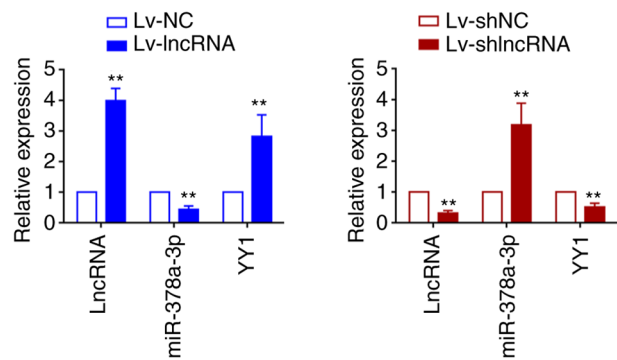

Figure S2. Relative expression of miR-378a-3p in HEC-1-A cells after the transfection with miR-378a-3p mimics according to reverse transcription-quantitative PCR. $P<0.05$ and $**P<0.01$ vs. control. miR, microRNA.
