

Table SI. Microvessel density in 4T1 tumors.

Group	Control	WG12399C	WG12592A	Zoledronate	CY
No. of microvessels \pm SD	6 \pm 2	5 \pm 1	7 \pm 1	6 \pm 1	5 \pm 1

Mice were inoculated orthotopically with 4T1 cells and treated with BPs. Microvessel density was quantified at a magnification of x200 in five intratumoral areas of the lesion and the final score was determined as a mean of the five quantified areas.
