

Figure S1. Relationship between CTSS expression and infiltrating activated memory CD4⁺ T cells and CD8⁺ T cells in BLCA, SKCM and UVM. BLCA, bladder urothelial carcinoma; SKCM, skin cutaneous melanoma; LGG, lower grade glioma; UVM, uveal melanoma; CTSS, cathepsin S; KIRC, kidney renal clear cell carcinoma.

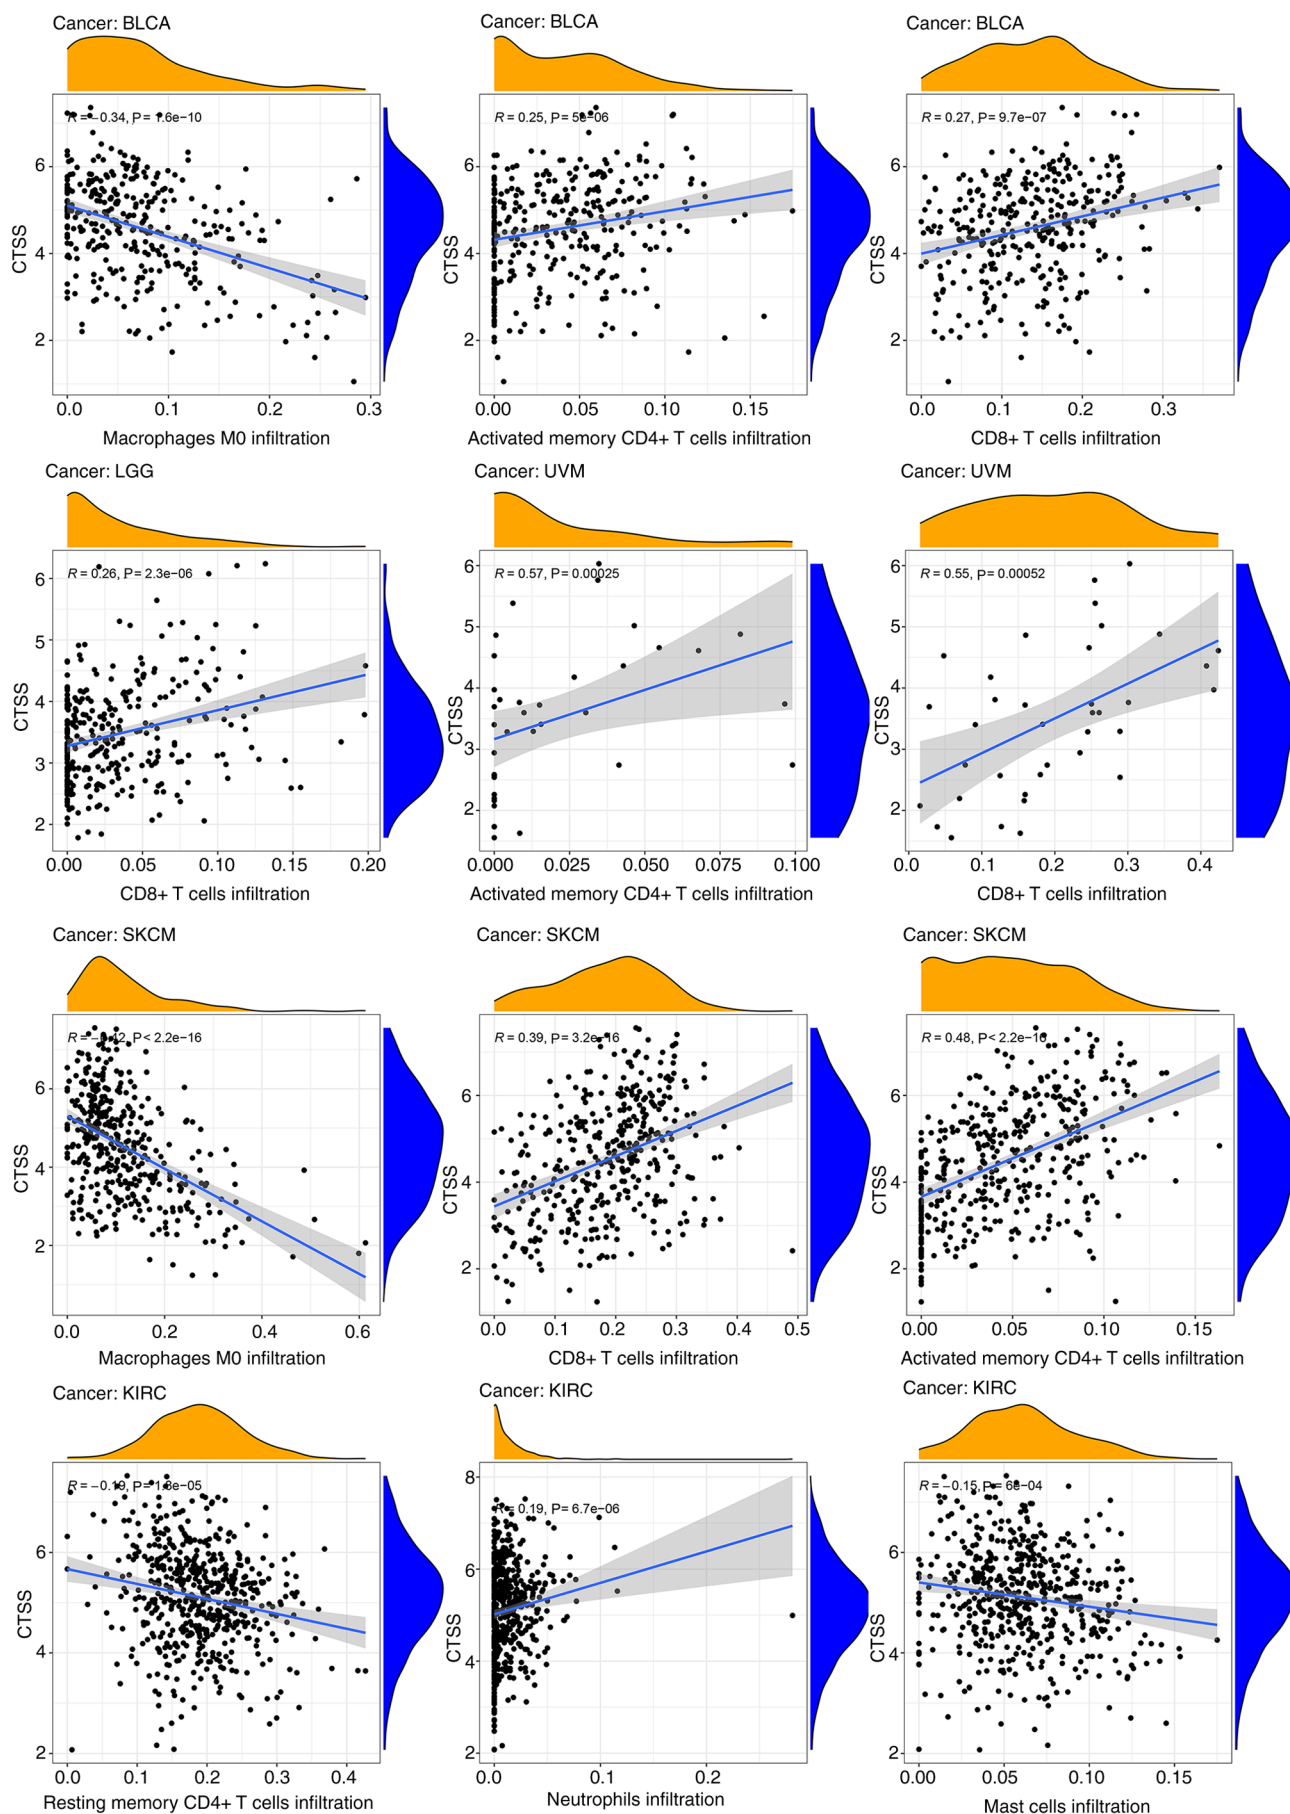

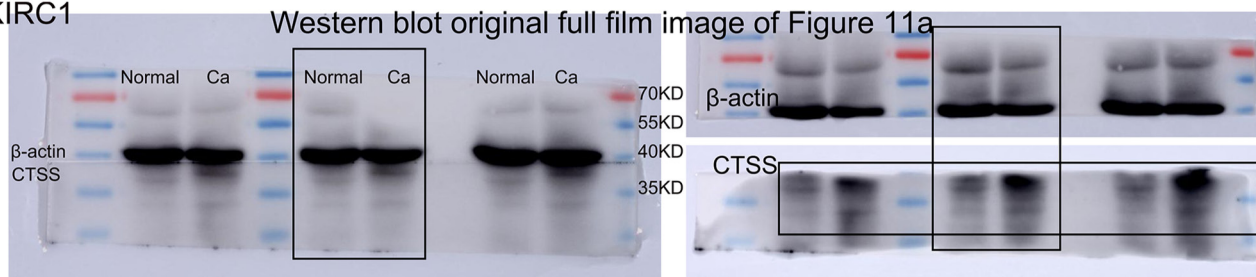

Figure S2. Original full-membrane images of the western blotting. CTSS, cathepsin S; KIRC, kidney renal clear cell carcinoma.

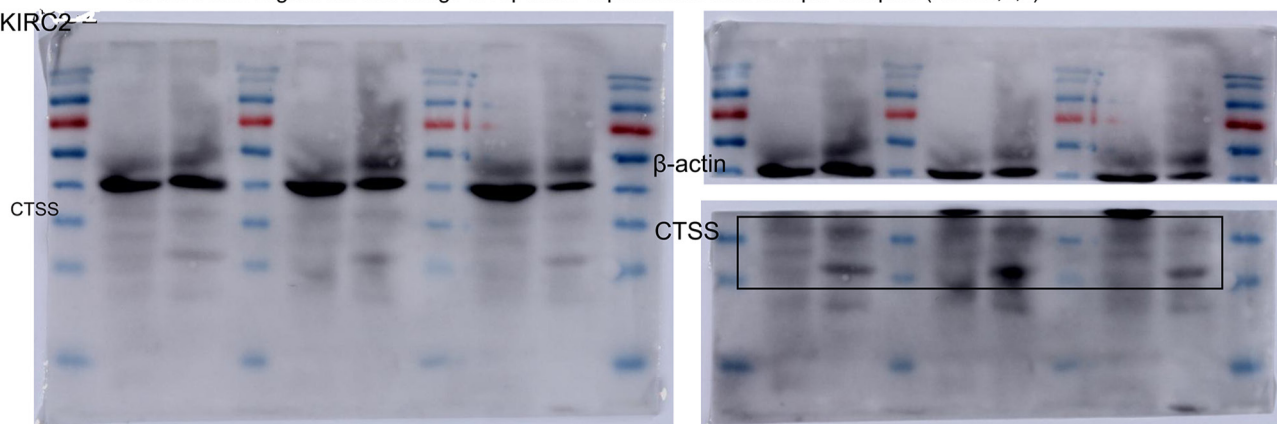

KIRC1

Western blot original full film image of Figure 11a

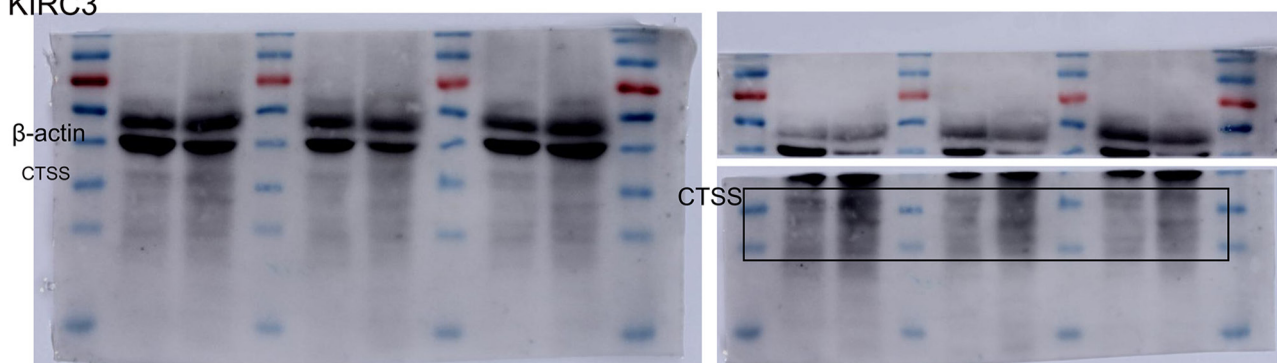

Western blot original full film image in repeated experiments with multiple samples (KIRC2,3,4)
