

Figure S1. Plasmids were successfully transfected into the cells. (A) Post-transfection with plasmids encoding Flag-FOXM1, the protein expression levels of FOXM1 in the cells were tested by western blotting. (B) Post-transfection with plasmids encoding HA-OTUD7B, the protein expression levels of OTUD7B were detected using western blotting. (C) Post-transfection with plasmids encoding shOTUD7B, the expression level of OTUD7B in the cells were detected by western blotting. OTUD7B, OTU domain-containing 7B; FOXM1, forkhead box protein M1; sh, short hairpin; NC, negative control.
