

Figure S1. Changes in blood cell count and fractionation. (A) Red blood cell count (each n=4); (B) hemoglobin concentration (each n=4); (C) hematocrit (each, n=5-10); (D) MCV (each n=4); (E) MCH (each n=4); (F) MCHC (each n=4); (G) white blood cell count (each n=3-4); (H) neutrophil count (each n=3-8); (I) lymphocyte count (each n=3-7); (J) monocyte count (each n=3-5). MCH, mean corpuscular hemoglobin; MCHC, mean corpuscular hemoglobin concentration; MCV, mean corpuscular volume; W, weeks-old.
