Read codes are a coded thesaurus of clinical terms. They have been used in the NHS since 1985. There are two versions: Version 2 (v2) and version 3 (CTV3 or v3). Both versions provide a standard vocabulary for clinicians to record patient findings and procedures, in health and social care IT systems across primary and secondary care (see: <https://digital.nhs.uk/services/terminology-and-classifications/read-codes>). SNOMED Concept and Description ID: SNOMED CT is a structured clinical vocabulary for use in an electronic health record. It is the most comprehensive and precise clinical health terminology product in the world (see: <https://digital.nhs.uk/services/terminology-and-classifications/snomed-ct>). SNOMED CT, Systematized Nomenclature of Medicine Clinical Terms.
