Figure S1. Flow chart of the experiments. (A) Mortality rates of mice induced by different doses of cisplatin (n=8). (B) Effects of YSJZD on the survival rate of cisplatin (20 mg/kg)-induced AKI mice (n=10). (C) Effects of YSJZD on the survival rate of cisplatin (18.75 mg/kg)-induced AKI mice (n=15). (D) Short-term effects of YSJZD on hepatotoxicity in mice (n=8). (E) Effects of YSJZD therapy in cisplatin (18.75 mg/kg) induced AKI mice. YSJZD, Yishen Jiangzhuo decoction; AKI, acute kidney injury.
