

Figure S1. Representative images of steatohepatic hepatocellular carcinoma. (A) Gross pathology. (B) Low-power imaging (H&E staining). (C) Low-power imaging (azan staining). (D) Low-power imaging (SHh immunohistochemistry). (E) Tumors showing ballooning, steatosis, inflammatory cell infiltration and fibrosis (H&E staining). (F) SHh-positive tumor cells (SHh immunohistochemistry). (G) Non-tumorous liver shows steatohepatitis (H&E staining). (H) Ballooned hepatocytes are positive for SHh (SHh immunohistochemistry). SHh, sonic hedgehog.
