

Figure S1. Heterogeneity between sepsis and normal samples across different datasets. PCA results demonstrated differences between sepsis and healthy samples in (A) GSE65682, (B) GSE154918 and (C) GSE185263 datasets. (D) PCA showed heterogeneity among the GSE65682, GSE154918 and GSE185263 datasets. PCA, principal component analysis; C, control; P, patient with sepsis; Dim, Dimension.
