

Figure S1. Scatter plot illustrating a significant positive correlation between vitamin D and systolic blood pressure.

Figure S2. Scatter plot illustrating a significant positive correlation between uric acid concentration and diastolic blood pressure.

Figure S3. Scatter plot illustrating a significant positive correlation between the urea and creatinine concentration.

Figure S4. Scatter plot illustrating a significant positive correlation between the calcium and potassium concentration.

Figure S5. Scatter plot illustrating a significant positive correlation between the magnesium and calcium concentration.

Figure S6. Scatter plot illustrating a significant positive correlation between the potassium and uric acid concentration.
