Figure S1. Visualization of intra/intergroup differences from K-means clustering results of the nomogram excluding Tg (frequency density distributions and boxplots). (A) Probability density distribution of K-means clustering results between training and validation groups at the 6-month follow-up. (B) Boxplot of K-means clustering results between training and validation groups at the 6-month follow-up. (C) Probability density distribution of K-means clustering results between training and validation groups at the 3-year follow-up. (D) Boxplot of K-means clustering results between training and validation groups at the 3-year follow-up.
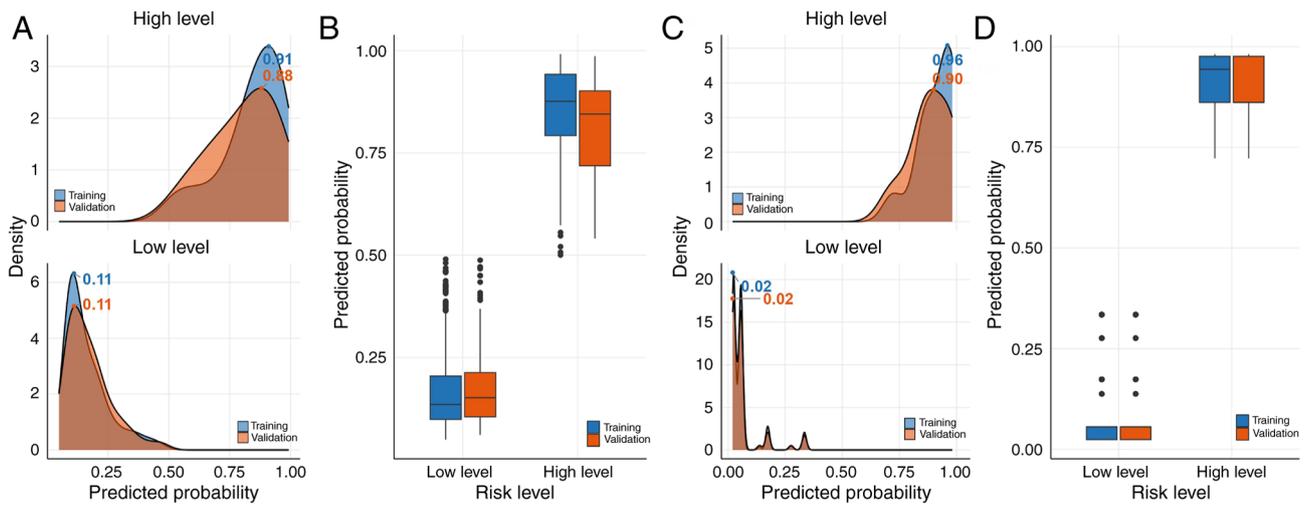

Figure S2. Visualization of intra/intergroup differences from K-means clustering results of the nomogram incorporating Tg (frequency density distributions and boxplots). (A) Probability density distribution of K-means clustering results between training and validation groups at the 6-month follow-up. (B) Boxplot of K-means clustering results between training and validation groups at the 6-month follow-up. (C) Probability density distribution of K-means clustering results between training and validation groups at the 3-year follow-up. (D) Boxplot of K-means clustering results between training and validation groups at the 3-year follow-up.
