

Figure S1. Validation of miR-145 overexpression and knock-down efficiency by reverse transcription-quantitative PCR. (A) Relative expression of miR-145 in cells transfected with miR-145 mimics compared with mimic NC. (B) Relative expression of miR-145 in cells transfected with miR-145 inhibitor compared with inhibitor NC. * $P < 0.05$, *** $P < 0.001$ miR, microRNA; NC, negative control.
