

Figure S1. IC_{50} values of (A) oxamate and (B) 2-DG in BV2 cells were determined using a Cell Counting Kit-8 assay. 2-DG, 2-deoxy-D-glucose.

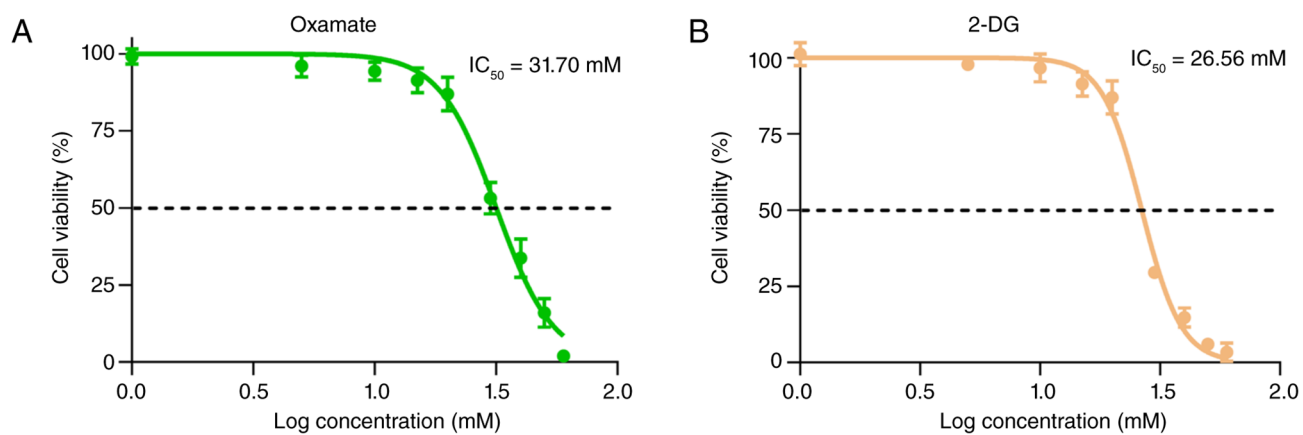

Figure S2. Overexpression of SIRT1, FBXW7 and NICD1 was confirmed by western blot analysis. (A) Overexpression of SIRT1 in wild-type BV2 cells. (B and C) Overexpression of FBXW7 and NICD1 in 293T cells. (D) Overexpression of FBXW7 in wild-type BV2 cells. NC, negative control; OE, overexpression.
