

Figure S1. The effect of STXBP1 overexpression on cell proliferation and apoptosis. (A) Flow cytometry plot showing the result of apoptosis experiment. (B) Bar plot showing the apoptosis rate in two groups. (C) The line chart showing the result of cell proliferation assay after overexpressed STXBP1. Error bars represent mean $\pm$ SEM. *** $P < 0.001$, **** $P < 0.0001$. STXBP1, syntaxin binding protein 1; NC, negative control; OE, overexpressed.

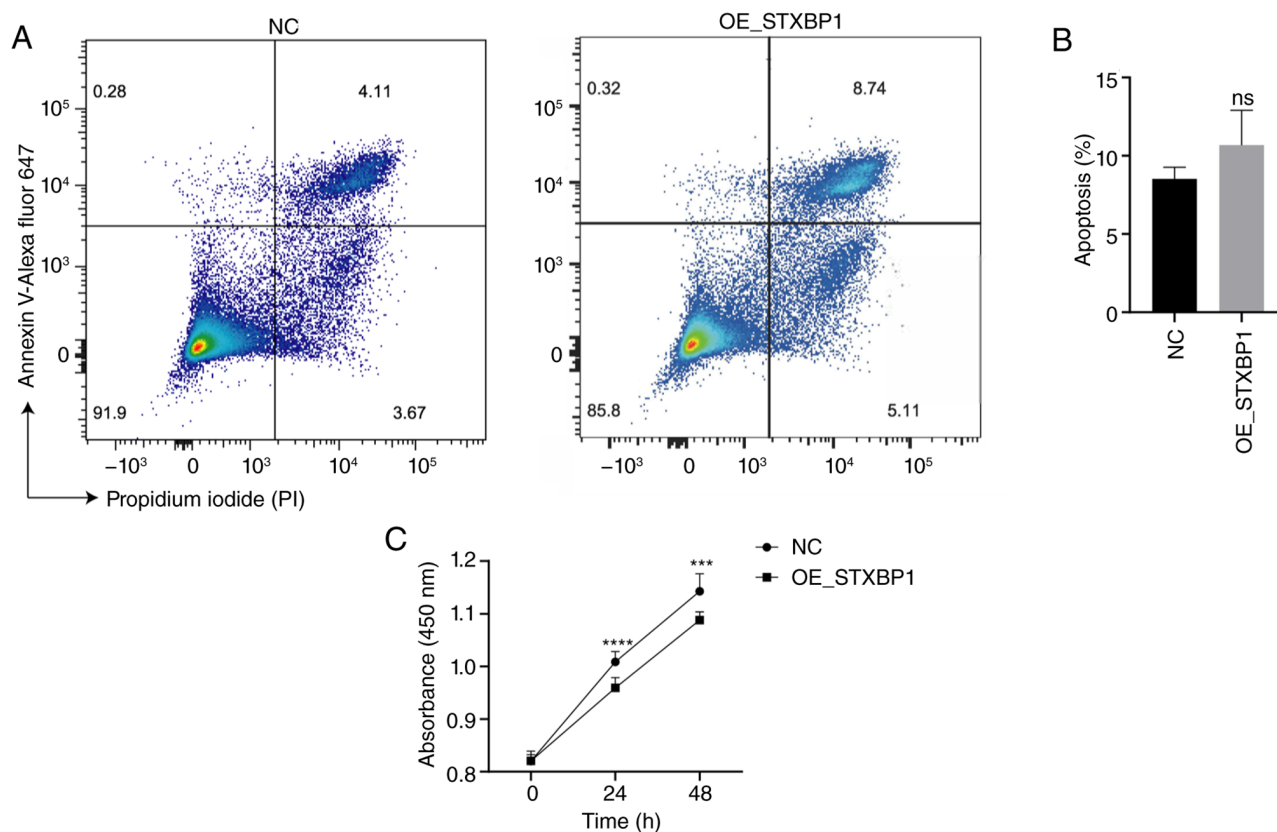

Figure S2. Survival curve showing the prognosis results of IL1A and UBE2I in patients with TNBC (data downloaded from TCGA). TNBC, triple-negative breast cancer; TCGA, The Cancer Genome Atlas.
